Risks and Technical Debts

Contents

A list of identified technical risks or technical debts, ordered by priority

Motivation

"Risk management is project management for grown-ups" (Tim Lister, Atlantic Systems Guild.)

This should be your motto for systematic detection and evaluation of risks and technical debts in the architecture, which will be needed by management stakeholders (e.g. project managers, product owners) as part of the overall risk analysis and measurement planning.

Form

List of risks and/or technical debts, probably including suggested measures to minimize, mitigate or avoid risks or reduce technical debts.

Risks	Solutions
Lack of knowledge and use of angularjs	Consult forumsLook at the documentationtake courses
Lack of knowledge of solid	Look at the solid forumsAsk other classmates
Abandonment / lack of work of a member	 Know the status of the entire project Hold periodic meetings
Lack of time to complete the project	• Do it stepwise and continue
Misunderstood the requirements of the application	Consult with the professor about the requirements
Problems with git	Use a specific methodology to do merges and commits
